CHILDREN AND FAMILIES AFFECTED BY PARENTAL DRUG USE: CURRENT GAPS AND PROMISING PRACTICES

Children and adolescents whose parents use drugs are often buried in silence. Their parents face the double challenge of parenthood and drug dependence but lack information on where to find adequate support. As a result, the drug problem has a growing negative effect on family dynamics. This online event will present recommendations and discuss strategies for developing human rights-based interventions targeting the whole family.

SPEAKERS Welcoming remarks: **Lucía Goberna**, Dianova International
